**2. Metropolitan Transportation Plan (MTP) 2045**

The next agenda item was an update on the 2045 Metropolitan Transportation Plan (MTP). Mr. Mike Skaggs updated the committee on the process for scoring highway projects for inclusion in the MTP. The criteria have been reduced from 17 to 8 at the request of the MPO Technical Advisory Committee (TAC) to simplify the scoring process. The criteria utilized during this update cycle of the MTP include: Average Daily Traffic/Facility Type, Safety, Freight Movement, Local Priority, Impact on

Minority/Low-Income Populations, Alternative Modes of Transportation, System Preservation, and Benefit/Cost. The total possible score for a project is 100. Mr. Skaggs also reviewed the project scoring spreadsheet and maps with the committee.

The committee requested that the map and project numbers be added to the project spreadsheet. It was also requested that the project description for KY 313 be updated to reflect more than just the current proposed widening of shoulders. The committee also discussed the need for the US 31W intersection at KY 84. A considerable amount of work has already been completed at this intersection. District 4 staff prefers to keep the project on the list for now to consider if any further action is needed.

Following discussion, Mr. Skaggs gave the committee a brief overview of the first four chapters of the MTP. These chapters include: Introduction, Public Involvement and Agency Consultation, Existing Conditions, and Socioeconomic Data, Land Use, and Environmental Conditions. The next steps in the MTP development process will be to complete the draft MTP, obtain approval from the TAC and Policy Committees, and then send the document out for a 30-day public review and comment period.
